Call for Session Proposals

Dear Colleague

Once again, the Yorkshire & Humber Federation of Museums and Art Galleries, supported by Yorkshire Renaissance and YMLAC, are organising a conference for all working in and for museums in the region.

This year, the conference will have two sets of concurrent sessions and the conference organisers are calling for session proposals from the sector.

We would welcome session proposals that cover the full spectrum of museum work; for example, collections management, conservation, exhibition production, programming, outreach, audience development, marketing, management, volunteers, governance, partnerships and advocacy.

Sessions could

- **Focus on examples of good practice or a recently completed project that you would like to showcase.**
- **Explore issues of professional interest and concern.**
- **Include contributions from more than one institution or from a professional network.**
- **Be a seminar, workshop or debate.**

The concurrent sessions will provide an opportunity to showcase the quality and diversity of professional practice within the region and will provide a significant CPD opportunity for those involved.

Each session will last a maximum of 45 minutes, though proposals can be submitted for shorter contributions and will be grouped together with complementary submissions.

Full details of the conference programme will be circulated in February, but put the date in your diary now.

If you are interested in proposing a session, please complete the enclosed proposal form and return it to YMLAC by 30 January 2006.
